

Homework Practice

3MR3.3, 3SDAP1.4

Make Predictions

The tally chart shows the results of spinning the spinner 50 times.

1. Make a prediction for the next number.

2. If you were to spin another 10 times, do you think the outcomes would be more even? Explain your answer.

Outcome	Tally	Number
2		15
4		10
6		12
8		13

3. There are 25 fruit candies in the bag: 8 orange, 10 lemon, and 7 strawberry. What flavor would you be most likely to pick? Explain.

4. If there were 7 orange, 7 strawberry, and 10 lemon fruit candies left in the bag, which would you have a better chance of picking: orange or strawberry, or lemon? Explain.

(Lesson 11-5)

Use any strategy to solve.

5. Jose had 25 cents in his pocket. What were all of the possible coin combinations he could have had?

6. Mr. Bolton was building a fence. He bought 20 lengths of fencing that were each 8 feet long. The perimeter of the fence was 145 feet. How much fencing did he have left over?
